2022 Construction Apprenticeship Guidebook

2022 Construction Apprenticeship Guidebook

View online at www.bitly.com/apprenticeshipguidebook.

Produced and compiled by

In partnership with

And with help from

On the cover: Long before she was a successful electrician's apprentice, Na'Quelle was a high school girl who liked books, sports, math and problem-solving. She loved physics class and started thinking about becoming an engineer. On the way there, she wanted to be a truck driver or heavy equipment operator, and build stuff since she loves physical work. After college, she moved to Seattle, working many different jobs before she learned about apprenticeship. She applied to three different programs and got into the Electrician's apprenticeship! Her life is much more stable now. She loves that learning new things is a daily part of the job, even after several years as an apprentice. But the biggest difference from her past jobs is the bond between electricians. It makes her feel so welcome. Her advice to you? Keep moving forward. Be persistent. Work hard on your own time to get where you need to go.

Learn more about other pathways into construction on Apprentices in Action (page 6).

Introduction

Are you looking for a career instead of a minimum-wage job? Are you considering a career in construction? Then you have come to the right place.

We need trained professionals to build structures like our homes, offices, high-rises, roads and bridges. These projects are essential to our everyday life and need hundreds of workers trained in more than 20 different building trades. Building trades (also called crafts) include laborers, ironworkers, cement masons, carpenters, heavy equipment operators, plumbers, sheet metal workers, painters and many more. This book will help you get started down the pathway to become one of these skilled professionals with a high-paying career in the building trades.

You do not need construction skills to get started; the professionals will teach you what you need to know. But there are some things you will need right from the start to succeed:

- Work ethic:** Be open to learn, love hard work and strive to be your best.
- Reliable:** Show up and work hard every single day, no matter what.
- Early:** Always be on-site a half-hour early to prepare for work.
- Learn:** Listen, pay attention, ask questions and follow directions.
- Hands-on:** Learn by doing, solving problems and overcoming challenges.
- Physical:** Ready for hard work, heights and cold, wet weather.
- Drug-free:** Construction sites can be dangerous. Everyone must be alert.
- Safety:** Pay attention. Wear safety gear at all times. Speak up.

If you need English language classes to help prepare you for training, see the [English Language Classes](#) section of the book.

Pre-Apprenticeship

Pre-apprenticeships are hands-on training programs that help prepare people for entry and success in the building trades. These programs provide construction training and education, and help with driver's licensing, transportation, child care, budgeting, getting a high school diploma/GED, etc. The best part is if you show up and bring your best every day, they will help you get into a paid apprenticeship program. Check out the [orange](#) section of this book to find a pre-apprenticeship program near you.

If you already have your high school diploma/GED, driver's license and a proven work ethic, you can apply directly to an apprenticeship in the building trade of your choice.

Apprenticeship

Once you are in an apprenticeship training program, you are working on a construction site, learning your trade from skilled professionals and getting paid. You EARN while you LEARN.

It takes about four years for apprentices to become experienced journey-level workers. They reach journey level by learning from experienced workers on the job site and taking classes. Apprentices get regular pay raises along the way, plus benefits and retirement.

You do not need past experience, a clean record or a college degree. You just need to apply and try out for the apprenticeship program that interests you most in the [green](#) section of this book. These training programs need people of color, women, veterans and residents of economically distressed [ZIP codes](#) in Seattle and King County.

A career in the building trades is important, fast-paced work that is physically and mentally challenging. At the end of each day, you will be very proud of what you have learned and what you have built. Most importantly, you will be able to support yourself and your family for a lifetime.

Experienced Workers

Candidates with five or more years of experience in a specific trade should contact the union hall directly:

www.seattle.gov/Documents/Departments/FAS/PurchasingAndContracting/Labor/SBCTC-Affiliates.pdf

Ready for a career in construction?

1. Start free training today!
2. Earn living wages + benefits + retirement

Pre-Apprenticeship

- FREE training
- No experience required
- 1, 3 or 6-month options
- Receive support with diploma/GED, driver's license, transportation, tools, and more
- Earn industry certifications
- Learn construction math

Must have:

- ID and be 18+
- Clean drug test
- Social security card or I-9 verification

Helps to have:

- Diploma or GED
- Driver's license

When you graduate they will connect you with an apprenticeship program.

Apprentices in Action

Al

Al is a PACT pre-apprenticeship graduate and laborer's apprentice for Local 242. Al's grandma raised him and enrolled him in sports starting at age five, where he built a work ethic and teamwork skills. As he grew older, he veered off that path, tried to take the easy route and made some big mistakes. After going to prison, Al decided to turn his life around and build a legacy for himself and his children. He just didn't know what to do — until he saw the Apprenticeship Guidebook in his counselor's office! That moment changed his life. Al saw that construction offered real wages, benefits and retirement plans. He worked with his counselor and community leaders to create a transition plan. Once he got out, he never looked back. Al is grateful for his new career with good wages, benefits and a retirement plan!

Pati

Pati is a pre-apprenticeship graduate and sheet metal apprentice. Before finding construction, Pati worked at a dead-end job, struggled to find affordable child care and had an abusive husband. She knew she had to leave and find a way to support her son. She learned about ANEW through a community college advisor. While there, she visited the sheet metal apprenticeship program, saw a picture of a Latina woman on the wall, and learned she was head of the women's committee. Pati joined right away and became friends with the woman on the poster. She's grateful she has this life, and never imagined she'd be where she is now. She had been so scared to start over, and it was hard, but it was the best thing she ever did. Now she knows she is capable of anything.

Justis

After graduating from high school, Justis was not on the best terms with his family, totaled his car and made some bad decisions. That was just the wake up call he needed. Justis decided he wanted something better. He began to commit himself to his personal best. One day he learned about ANEW's Pre-Apprenticeship Construction Education. He took three buses each way to complete the program. After graduation, he applied as a plumber and pipefitter apprentice. He began working as a helper, and is now an apprentice! Justis loves his new career. He learns something new every day. He relies on mentors to help him through any challenges that arise. He is more disciplined now, more mature, better with his money — and wants you to know it's never too late to get it right. Give it all you've got. You never know what doors will open!

Giovanni

Giovanni is a carpenter's apprentice who has worked on the Seattle Waterfront project. He loved to build things growing up, but at first didn't consider carpentry for a career — his family and teachers always told him college was the way to go. But after running into financial problems, he reconsidered, and introduced the idea of carpentry to his parents. He started the apprenticeship in the fall of 2020. His journey workers and superintendent love his work ethic and developing skill set. He loves working outside in the open air, even in bad weather. He earns more money than his family thought possible, and can plan for the future. His advice? New information comes at you fast. Pay attention and be a problem solver.

Support Services

For Pre-Apprentices and Apprentices

Apprenticeship Resource Center (ARC)

A Program of ANEW

ARC services are available to registered apprentices. ARC provides clients with support services such as:

- PPE gear and workwear.
- Required work tools.
- Education services: tuition, books and apprentice class fees.
- Transportation assistance: gas card, ORCA card or bus passes.
- Union dues and initiation fee payment assistance.
- Emergency financial assistance (based on available funding).
- Referrals to other community services.

ARC services are here to help clients achieve a greater level of self-sufficiency.

To Apply

- Make an appointment.
- Complete intake paperwork.
- Bring ID, SSN and most recent paystubs to determine eligibility.

Washington State Department of Labor and Industries (LNI) Apprenticeship Program

The Apprenticeship Program at LNI serves as the administrator to the Washington State Apprenticeship and Training Council, which oversees registered apprenticeship and recognized preparatory apprenticeship programs, promoting a highly skilled, diverse construction workforce: www.lni.wa.gov/licensing-permits/apprenticeship/become-an-apprentice

Urban League of Metropolitan Seattle (ULMS)

ULMS is dedicated to assisting and preparing individuals to enter pre-apprenticeship and apprenticeship programs and access work in construction. ULMS can assist with applications and collection of required documents needed to enter a training program. ULMS's goal is to provide wraparound support services for clients and help them become successful apprentices, with the long-term goal of reaching journey level.

Services include:

- Credit counseling classes.
- Driver's license assistance.
- First-time homebuyer's class.
- Financial assistance for initiation fees, union dues, tools, work clothes, transportation, food hygiene and rent.

Washington State Department of Veterans Affairs (WDVA)

The WDVA supports all veterans, transitioning service members and their families in finding living-wage careers through GI Bill-approved apprenticeship programs. Use the resource guide to find information on state-registered apprenticeship programs and determine your approximate wage with your GI Bill benefits: www.wacareerpaths.com/apprenticeships/. Questions? Contact the WDVA Apprenticeship Section at apprenticeship@dva.wa.gov or 360-999-8024.

Alternative Solutions

The Department of Social and Health Services (DSHS) is redesigning service to customers through the Division of Child Support's (DCS) Alternative Solutions. There are new grants, programs and services available to pre-apprentices and apprentices to ensure they have a successful and sustainable construction career. Alternative Solutions assists with:

- Setting reasonable child support payments.
- Reinstating driver's licenses.
- Connecting people to services for legal issues, parenting plans, housing, mental health, immigration, child care and more.

The [Alternative Solutions](#) program includes a comprehensive, user-friendly database called the [DSHS Community Resource Directory](#) with over 4,500 statewide community-based organizations providing barrier removal services.

DSHS created this database to ensure that people have the support they need to succeed.

RPAC | REGIONAL PRE-APPRENTICESHIP COLLABORATION

The Regional Pre-Apprenticeship Collaboration (RPAC) works to build direct and sustainable pathways to high-paying construction careers for Puget Sound residents, especially African Americans, women and people of color.

RPAC is committed to a regionwide pre-apprenticeship system through outreach, rigorous training, retention services and policy work that help people get in, stay in and complete apprenticeship.

Interested in attending?

RPAC welcomes anyone interested in creating a strong construction worker pathway.

- **Contractors:** Access a trained and ready workforce. Influence preparatory training and apprentice retention. Set the trend for productive, safe and inclusive work sites.
- **Apprenticeship Coordinators:** Access trained and ready applicants. Strengthen the quality of incoming apprentices. Establish inclusive, safe training environments. Retain apprentices
- **Public Agencies:** Support career pathways for local African American, Indigenous, people of color and women. Create inclusive, productive and safe work sites. Retain apprentices.
- **Community Organizations:** Connect clients to construction careers with living wages, benefits, career growth and support services.
- **Pre-Apprenticeship and CTE Programs:** Access best practices for training, share resources and coordinate funding and outreach.

Date: Last Friday of each month

Time: 8 a.m. to 10 a.m.

Check the RPAC website for specific meeting information: www.psrpac.org

Pre-Apprenticeship

Pre-apprenticeships are hands-on training programs that help prepare people for entry and success in the building trades. These programs provide construction training and education, in addition to helping with driver's licensing, transportation, child care, budgeting, etc. The best part is if you show up and bring your best every day, they will help you get into a paid apprenticeship program.

If you already have your high school diploma/GED, driver's license and a proven work ethic, you can go directly to the apprenticeship section and apply to the building trade of your choice.

ANEW

Pre-Apprenticeship Construction Education (PACE) & Trades Rotation Program (TRP) — Programs of ANEW

Multiple trade skills taught in construction shop

Employment skills (resumes, interviews, etc.), life skills (budget, teamwork, etc.) and construction math taught in classroom

Industry certifications offered

TRP offers women cohorts, PACE offers co-ed cohorts

Twelve-week training programs, three days a week, with field trips to apprenticeship programs and construction sites

May qualify for college credits (if eligible, tuition assistance available through BFET, TANF, RISE and WIOA)

Minimum Qualifications:

18+

Clean drug test

Desire a career in construction

Preferred Qualifications:

High school diploma or GED (or able to obtain by end of program)

Driver's license (or able to obtain by end of program)

Application Process

Attend orientation (see schedule at www.anewcareer.org/events)

Bring to the information session:

Driver's license

Social Security card

Cost

Training is free

Need to Succeed

Be physically capable to do the work

Show up early every day

Work well with others

Carpenters Pre-Apprenticeship

Northwest Carpenters Institute (NWCI)

Fast-paced three-week, trade-specific pre-apprenticeship programs for carpentry, interior systems (drywall, acoustical ceilings and metal stud framing) and pile driving

Teaches the latest industry trends

Learn basic tool skills, craft specific projects, learn trade math and build employability skills

Includes a strong focus on safety

Graduates have preferred entry into carpenters apprenticeship

Minimum Qualifications:

18+

17 years old
may also apply
with parent's
permission

Preferred Qualifications:

Proficient in
math

Confident
reading a tape
measure

Familiar with
hand and
power tools

Ability to follow
instructions and
work in a team
environment

Application Process

Contact the program staff for more information on how to apply to the pre-apprenticeship program

Cement Masons

JATC Pre-Apprenticeship

Two weeks of trade-specific training, including basic tools, safety training and hands-on projects

Direct entry into Cement Masons Apprenticeship Committee upon successful completion

Minimum Qualifications:

18+

Driver's license

Second form of ID or I-9 verification

High school diploma or GED

Be able to pass a drug test administered on the first day of pre-employment training

Application Process

Applications are accepted throughout the year

Applications are available online: www.CMPLtraining.org

Submit the following to concretetraining@trowelout.org:

Complete application

Driver's license

Social Security card or I-9 verification

High school diploma or GED

Attend a one-day, hands-on assessment where you will be evaluated based on your problem solving, agility, effective listening, communication, hand-tool coordination, punctuality and strong work ethic

Cost

Training is free

Those who qualify can get assistance with tools, boots and initiation fees

Need to Succeed

Be physically capable to do the work

Show up early every day

Work well with others

Be ready to learn

Enjoy hands-on work

Palmer Scholars

Palmer Pathways Pre-Apprenticeship Program

Serves young adults of color ages 18-26
Combines career exploration with hands-on experience
Offers two phases
Phase One is six weeks of career exploration and preparation, soft skill development, safety training,

workplace competencies, physical conditioning, construction math and trades knowledge
Phase Two is an optional eight-week dive into hands-on construction and skill development to earn six certifications and prepare for apprenticeship

Minimum Qualifications:

18-26

At time of application

Low income (e.g., SNAP/TANF recipient)

High school diploma or GED

Driver's license or other ID

Social Security card or proof of legal employment status

Live in Pierce County

Identify as a person of color

Application Process

Fill out an interest card to be contacted by our team at www.palmerscholars.org/pathways or email us at pathways@palmerscholars.org to begin the process

Full application will be completed in person or via Zoom

Union Apprenticeship

Once you are in an apprenticeship training program, you are working on a construction site, learning your trade and getting paid. You EARN while you LEARN.

It takes about four years for apprentices to become experienced journey-level workers. They reach journey level by learning from experienced workers on the job site and taking classes. Apprentices get regular pay raises along the way, plus benefits and a pension.

You do not need a clean record, a college degree or past experience. You just need to apply and try out for one of the pre-apprenticeship or apprenticeship training programs in this book. These training programs need residents of King, Pierce and Snohomish counties, veterans, women and people of color.

Boilermakers 104

Represented by the International Brotherhood of Boilermakers Local 104

Boilermakers are complete metal fabricators in shops and shipyards. They work with steel, aluminum and other metals to fabricate boilers off-site that get

delivered to construction sites. While they weld ships, bridges, boilers, water tanks, wood chippers, etc., their focus is mainly on the maritime industry.

Minimum Qualifications:

18+

High school diploma or GED

Driver's license or other state- or federal-issued ID

Clean drug test

Application Process

Applications accepted Wednesdays from 9:30 – 11 a.m.

Complete an assessment

Once placed in the candidate eligibility pool, you may be called in for an interview

Candidates in the eligibility pool may seek their own employment as an apprentice

Need to Succeed

Be physically capable to do the work

Show up early every day

Work well with others

Be ready to learn

Enjoy hands-on work

Have reliable transportation

2022 Hourly Wages

Starting Apprentices \$26 Total (Wage + Benefits)

Journey Workers \$36-\$40+ Total (Wage + Benefits)

Boilermakers 502

Represented by the International Brotherhood of Boilermakers Local 502

Boilermakers are complete metal fabricators on construction sites. They work with steel, aluminum and other metals. Their work includes new construction, repair and maintenance of things like

boilers, cranes, tanks, pipelines, cable-ways, pressure vessels and structural frames. They rig and lift loads with rope, steel cables and chains, operate power tools and may work in extreme temperatures.

Minimum Qualifications:

18+

High school diploma or GED

Driver's license

Clean drug test

Application Process

Applications are handed out at the training office Monday to Friday from 8 a.m. - 5 p.m.

Need to Succeed

- Be physically capable to do the work
- Show up early every day
- Work well with others
- Be ready to learn

Bricklayers and Allied Craftworkers

Represented by the Bricklayers and Allied Craftworkers (BAC) Local 1 WA/AK Apprenticeship and Training - Western Washington Masonry Trades

Masonry trades include bricklayers, tile setters, pointer-cleaner-caulkers, refractory, marble setters, terrazzo workers and finishers. Professionals in each craft work inside and out at substantial heights and ground level.

Most of their work involves finishes; some is structural, and all crafts require attention to detail and creative problem-solving skills. Their beautiful, finished surfaces last for years.

Minimum Qualifications:

- 
18+
- 
High school diploma or GED
- 
Driver's license
- 
Social Security card or I-9 verification
- 
Clean drug test

Application Process

- Application must be filled out and turned in on the same visit
- Bring driver's license, high school diploma or GED and Social Security card
- Qualifying veterans may use their GI bill
- Pass drug test
- Complete pre-job training
- Pass basic math test

Need to Succeed

- Be physically capable to do the work
- Show up early every day
- Work well with others
- Be ready to learn
- Enjoy hands-on work
- Have reliable transportation

Carpenters

Represented by the Pacific Northwest Regional Council of Carpenters (PNWRCC) Locals 30, 41, 70, 96, 129, 196 and 816

Multiple four-year training programs are offered within the carpenters training program. General carpenters lay out, measure, cut, erect and join materials. Interior systems professionals install acoustical ceilings, metal framing and wall partitions. Millwrights install and repair machinery like compressors, turbines and monorails. Piledrivers drive piling into the earth

to ensure buildings are stable. Scaffold erectors build and maintain scaffolding. Shipwrights repair and renovate boats. Trade show workers and floor coverers are also carpentry crafts. Insulators insulate buildings with vapor barrier, spray foam insulation, and install batting. The insulator program is two years.

Minimum Qualifications:

18+

Or 17 years old with written parental consent

Driver's license

Clean drug test

Application Process

Fill out application - online at www.nwci.org

Attend 8-hour trade orientation, including hands-on assessment and math exam

Attach valid and current:

- Résumé

- Training documents (pre-apprenticeships, classes, certifications)

- Work experience documents (check stubs, W-2s)

- Military documents (DD214, ID Card)

Cement Masons

Represented by the Cement Masons and Plasterers of Washington Local 528

Cement masons place, smooth, finish and repair concrete structures from heavy commercial to private residential projects. This includes floors, walls, sidewalks, curbs, columns, bridges and high rises. They also set forms; polish concrete; perform structural repair; apply epoxies and polymer-modified products;

and apply decorative and structural coatings. Cement masons use a variety of hand and power tools. They work on the ground, underground, on scaffolds and on various work platforms. The work can be physically demanding and meticulous. Often the work is a finished product to be seen for years afterwards.

Minimum Qualifications:

18+

High school diploma or GED

Driver's license

Second form of ID or I-9 verification

Clean drug test
(administered by the apprenticeship during orientation)

Application Process

Applications are accepted throughout the year

Applications are available online: www.CMPLtraining.org

Submit the following to concretetraining@trowelout.org:

Completed application

Driver's license

Social Security card or I-9 verification

High school diploma or GED

Attend a one-day, hands-on assessment where you will be evaluated on your problem solving, agility, effective listening, communication, hand-tool coordination, punctuality and strong work ethic

Selected candidates shall attend an 80-hour pass/fail class

A passing grade is required to become an apprentice

Laborers prepare construction sites by eliminating hazards, digging trenches, drilling, lagging, tunneling, laying pipe, performing traffic control, laying asphalt on heavy highway projects, mixing and placing concrete and setting bracing to support excavations. They load, unload and distribute materials. They also support

many other craft workers with fireproofing, mason tending, carpentry tending, asbestos, demolition, shotcrete and hazardous waste removal. Positions include concrete foremen, pipe foremen, safety supervisors, hazardous material supervisors and asbestos supervisors.

Minimum Qualifications:

18+

Driver's license

2nd form of ID (Social Security card or passport)

Clean drug test

High school transcript that shows completion of 10th grade, GED, high school diploma, or equivalent from other country

Application Process

- Complete application
- 4-5 hour orientation (call for dates, times and location)
- Take assessment test: construction, hand and power tools, machinery, safety, reading and math
- Submit documentation of achievement for extra credit:
 - Education
 - Training
 - Work experience certification (pay stubs, W-2s)

Complete in-person interview with coordinator
 Selected candidates must complete one-week of pre-construction training and pass drug test

Need to Succeed

- Be physically capable to do the work
- Show up early every day
- Work well with others
- Be ready to learn
- Enjoy hands-on work
- Have reliable transportation

Operating Engineers

Represented by the International Union of Operating Engineers (IUOE) Locals 302 & 612

Operating engineers operate the bulldozers, motor graders, backhoes, paving machinery and cranes that help to form highways, site infrastructure and skylines. They work mines, dig wells, survey sites, pave and

grind roads, drill and hoist steel and slabs. They also do the final grading as well as maintain/repair machinery. Operating engineers may travel up to 80 miles or more to job sites.

Minimum Qualifications:

18+							
	High school diploma or GED*	Driver's license (DD-14 if necessary for veteran credit)	Social Security card or I-9 verification	Proficient in English	Clean drug test	Pass physical exam	Complete math and reading tests

*Diploma waiver granted for applicants who can provide documentation that they've worked at least two years in construction. Waiver also requires a minimum of 80% on math and reading tests.

Application Process

Applications due in November for selection and training the following spring

Applications are available at www.oetraining.com or from the training office

Qualified applicants will be notified of time and place to appear for interview

Top applicants are required to complete one-week safety and orientation training in Ellensburg

2022 Hourly Wages

Starting Apprentices	\$31.58–\$33.88	Wage
	\$23.37	Benefits
	\$54.95–\$57.25	Total

Painters

Represented by the International Union of Painters and Allied Trades (IUPAT) Local 300

Painters first prepare a variety of surfaces (wood, masonry, drywall, plaster, concrete, metal) prior to the application of paint, high performance coatings, waterproofing, fireproofing and decorative finishes.

They then apply decorative and protective finishes in residential and commercial settings. Painters work on marine vessels, commercial buildings, residences, and industrial plants and bridges.

Minimum Qualifications:

18+

Social Security card (or other forms of ID to fulfill I-9 requirements)

Application Process

Apply at the training office by appointment on Tuesday or Thursday from 10 a.m. to 3 p.m. Applicants are then interviewed and ranked

Applicants must contact the training office on or before the first business day of each month

Need to Succeed

- Be physically capable to do the work
- Show up early every day
- Work well with others
- Be ready to learn
- Enjoy hands-on work
- Have reliable transportation

Plasterers

Represented by the Plasterers and Cement Masons of Washington Local 528

Plasterers provide the interior and exterior finishes on walls of buildings and homes, using primarily hand tools and a wide variety of materials. They make finishes look like wood, stone, block and marble. Machines are also used to apply plastering materials, but handcraft skills are the majority of the work. They

use conventional plaster, veneer plaster, stucco, weather barriers, exterior insulated finish systems, fireproofing and more products. Must be in physical shape and have good balance, eyesight and hearing. Plasterers work indoors and out. They are required to work from heights on scaffolding, swing stage and lifts.

Minimum Qualifications:

18+

High school diploma or GED

Driver's license

Second form of ID or I-9 verification

Clean drug test
(administered by the apprenticeship during orientation)

Sheet Metal Workers

Represented by SMART, the International Association of Sheet Metal, Air, Rail and Transportation Workers, Local 66

Sheet metal is any metal that can be formed into flat pieces. These metals include cold rolled steel, mild steel, stainless steel, tin, nickel and copper. Sheet metal workers cut, roll, bend and shape these pieces into HVAC system ductwork, medical tables, building

facades, etc. After fabricating their products, sheet metal workers install what they created. Sheet metal work also includes service and maintenance of HVAC equipment and testing, adjusting and balancing of HVAC systems.

Minimum Qualifications:

18+

High school diploma or GED

Driver's license

Proof of auto insurance

Clean drug test

Applicants accepted into the HVAC service technician or HVAC controls technician programs must have a current:

- Washington state electrical training certificate **OR**
- Washington state electrical certification

Application Process

Applications must be filled out at www.wwsmjatc.org

Within 30 days, submit:

- Driver's license
- High school transcript or GED scores
- Proof of auto insurance

Applicants will be scheduled for a math and reading exam

Qualified applicants may be scheduled for an interview and minimum qualification screening day prior to being placed on ranked eligibility list (highest score first)

Apprentices are accepted as needed based on:

- Interview score
- Minimum qualification screening day score
- Clean drug test
- Geographic availability
- Timely response to contact from apprenticeship

Need to Succeed

- Be physically capable to do the work
- Show up on early every day
- Work well with others
- Be ready to learn
- Enjoy hands-on work
- Have reliable transportation
